Complete Module

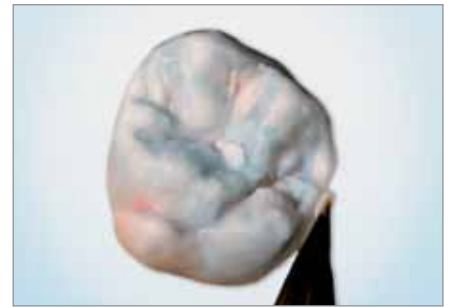

\*Now to the complete assortment is absent only dimension One module.

# Reflex dimension – The modular design

Reflex dimension is compact, is limited to what is really essential and can even be individually assembled in a new dimension. Master aesthetic and technical challenges - ranging from the single-layering techniques and classic standard three-layer techniques to individual layering including bleach and 3D Master colouring\* - this is what you can look forward to. You can quickly and conveniently expand existing modules with the add-ons.
