

## ZENOTEC TITANIUM BASES

### AN INTELLIGENT BASIS FOR ZIRCONIUM OXIDE

When it comes to implant-borne restorations, the sheer perfection afforded by the ZENOTEC system is evident from the very start: custom-designed CAD/CAM zirconium oxide abutments, supported on titanium bases which are a perfect fit for the most important implant systems. With the aid of the 3Shape AbutmentDesigner™ and ZENOTEC Cad ImplantDesigner software applications, highly aesthetic results with optimized emergence profiles can easily be obtained. And it is economical, too.

- ZENOTEC titanium bases including lab screw and fixing screw
- Perfect fit between the implant and the zirconium oxide framework
- Affordable scan abutments for all ZENOTEC titanium bases
- Tested by the Fraunhofer Institute (Germany) for Mechanics of Materials IWM

Put your CAD/CAM framework production on an intelligent basis. With ZENOTEC. EXPECT THE DIFFERENCE! BY WIELAND.
